CP1025

Haematology and medicine trolley

This trolley is suitable for the generic pharmacy and wards for the preparation of the therapy, useful also in the hematology wards for the transport of knapsacks of plasma or collectors of test-tubes.

The trolley is composed by two doors with two inner sides made of ABS where it is possible to fit small baskets and basins ISO certificated. On one side there is a shelf support for infusion pump or aspirator, and on the opposite ALIBOX waste bin for special wastes and a waste bin with knee opening.
